Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-24 are presented for examination.
2. A telephone call was made to William M. Lee Jr. on 1/15/2003 to request an oral election to the restriction requirement below, but did not result in an election being made.
3. Applicant is advised that the reply to this requirement, in order to be complete, must include an election of the invention to be examined, even though the requirement may be traversed (37 CFR 1.143).
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Election/Restrictions

5. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Art Unit: 2121

- I. Claims 1-11, 13-15, and 17-22, drawn to a method for remotely controlling a destination terminal from an originating terminal, classified in class 700, subclass 3.
- II. Claim 12, drawn to the composition of an originating terminal, classified in class 700, subclass 1.
- III. Claim 16 and 23, drawn to a specific signal using a specific protocol, classified in class 700, subclass 39.
- IV. Claim 24, drawn to a method for identifying a caller, classified in class 379, subclass 142.06.

6. The inventions are distinct, each from each other because of the following reasons: Inventions I, II, III and IV are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I has separate utility such as in a system lacking the composition or specific features of an originating terminal, a specific signal comprised of a specific protocol and a method for identifying a caller. Invention II has separate utility such as in a system lacking a specific signal comprised of a specific protocol and a method for identifying a caller. Invention III has separate utility such as in a system lacking a method for identifying a caller. See MPEP 806.05(d).

Art Unit: 2121

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

8. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-IV, and vice versa, restriction for examination purposes as indicated is proper.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
